

POWER METER SERVO METER

2 in 1

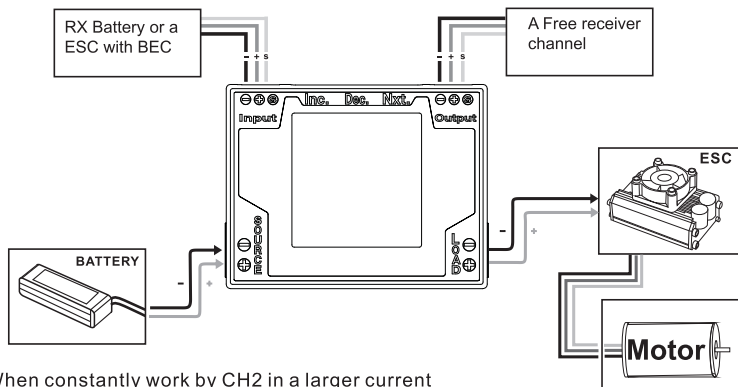

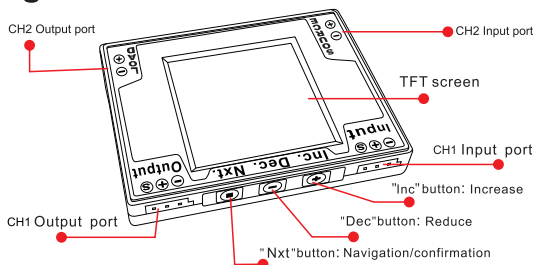

1.Special Features:

- 1.1 To measure the current, voltage, power
- 1.2 Record the biggest current value : If current more than the set, will automatically alarm
- 1.3 Record the minimum current value : If current less than the set, also will automatically alarm
- 1.4 Record operation in current curve
- 1.5 Records provided the capacity of the power value

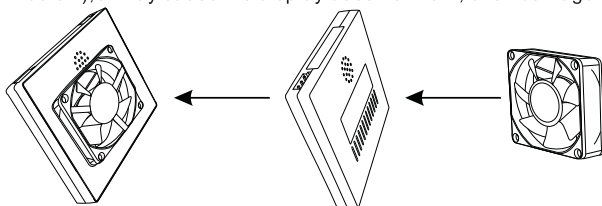

2.Performance parameter:

- | | | |
|-----------------------|-----------------------|-----------|
| 2.1 SERVO METER - CH1 | < Input Voltage Range | max. 8.4V |
| | Input Current Range | max. 10A |
| 2.2 POWER METER - CH2 | < Input Voltage Range | max. 60V |
| | Input Current Range | max. 100A |
| 2.3 Display | 1.5" TFT | |
| 2.4 Weight | 28g | |
| 2.5 Diension | 58x45x9 mm | |
| 2.6 Port | UNI / DC | |
| 2.7 Non-self-powered | | |

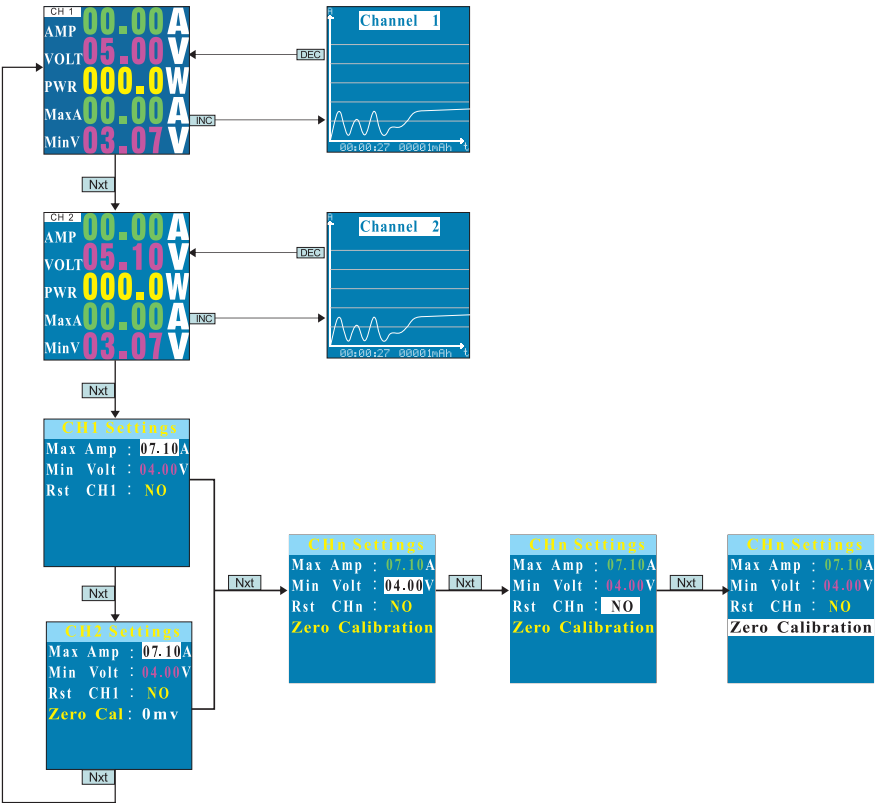

3.Configuration:

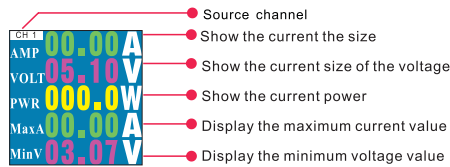

★ When constantly work by CH2 in a larger current circumstances, it may need to add a cooling device (shown below), or may cause the display does not work, even damage the display.

4.Operating instructions

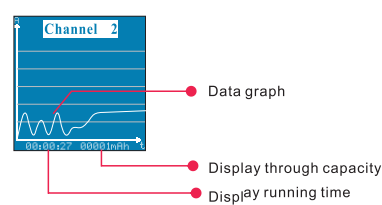

4.1 To measure the current, voltage, power menu.

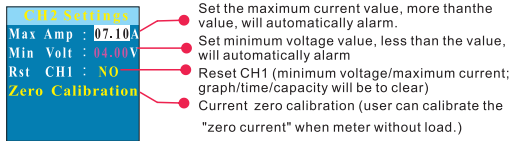

When the voltage less than the set value, current more than the set, will show a warning While the voltage or current will be highlighted.

4.2 Current graph menu

4.3 Warning settings

Warning message

when current/voltage value over the setting value, meter warning!

【Notice】

DO NOT use it for more than 10 seconds when the current value is close to 100A
