

## Balance charge 4xLiPo batteries at the same time simultaneously

4 Independent output can charge 4 batteries at the same time

Max. 100W/5A charge on each channel

## 4 Channel Intelligent Balance Charger

Dedicated design for FPV, 4CH independent output, support 3-4S LiPo Battery

**FPV**  
CHARGER

**LiPo**  
3-4cells

**4CH**

Applicable to the mainstream FPV batteries, 4CH independent output which can charge 4 LiPo batteries at the same time. equipped with LED indicator and buttons, Max. 100W/5A charging for each channel.

## Dedicated design for FPV racing drone

Suitable for the mainstream FPV batteries, no longer need adapter cable or balance board, plug and play.

## More wider range of application

Not only for FPV batteries, but also for the common 3S/4S LiPo batteries which is used for other RC models or drones.

## Built-in strong convection cooling fan

With built-in strong convection cooling fan, internal air duct design, cooling slots on the bottom and sides, make sure the charger always in safe temperature and low noise

## Multiple protection, safer using

e5 conform to national safety standards, built-in intelligent safeguard protection system. Not only protect the charger but also prevent the battery bubbling or expansion during charging.

over current

protection

### 3 Different charging current optional

In order to charge the batteries at safety C rate,E5 provides 3 different charging current for user's setting,user can set the current by the cambered button.

2A charge

3A charge

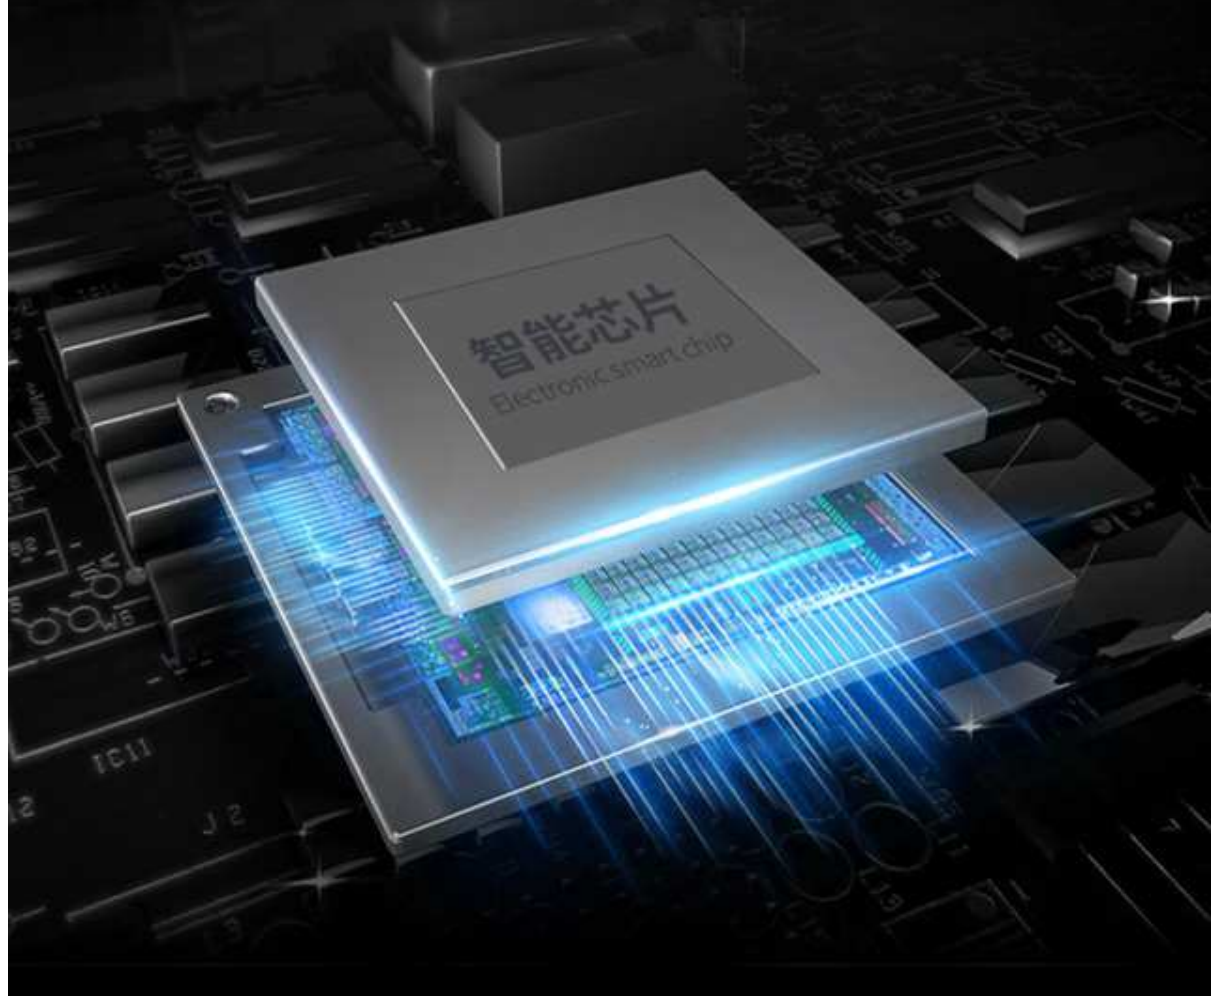

5A charge

## Intelligent chip control maximum safety and high efficiency

Built-in intelligent identity management chip,intelligent detect charging equipment  
and intensify constant-current technology,raise the efficiency and  
avoid battery or charger damage

## DC Input meets the demand of outdoor use

e5 accepts a power supply of 11-32V output, and vehicle power or battery pack as well, meets user's demand of outdoor use, never worry about no battery can be used any more when play in the field.

## Excellent material anti-flaming and falling-resistant

The shell made from PC anti-flaming material, fireproof and higher temperature resistant Lighter and stronger, shell never fade, doll polish technology scratch resistant

Anti-flaming

high temperature resistant

falling-resistant

## Specification

DC Input :	11V-32.0V
Charge power :	200W
Charge current :	2A/3A/5A
Battery type :	LiPo
Battery cell count :	3S-4S
Charge Instructions :	LED light
Charge mode :	Balance Charge
Balance current :	500mA/cells
Dimension :	126x126x42mm
Weight :	400g

## Safe technology, use at ease

Strict manufacture and assembling technology, structural design  
use seamless connection

## Portable design,weighting only 400g

Supports charging 4 batteries at the same time,but weights only 400g

## Small and light,easy to carry

Compact design for outside easy carrying

iPhone 7Plus

158.2x77.9x7.3mm

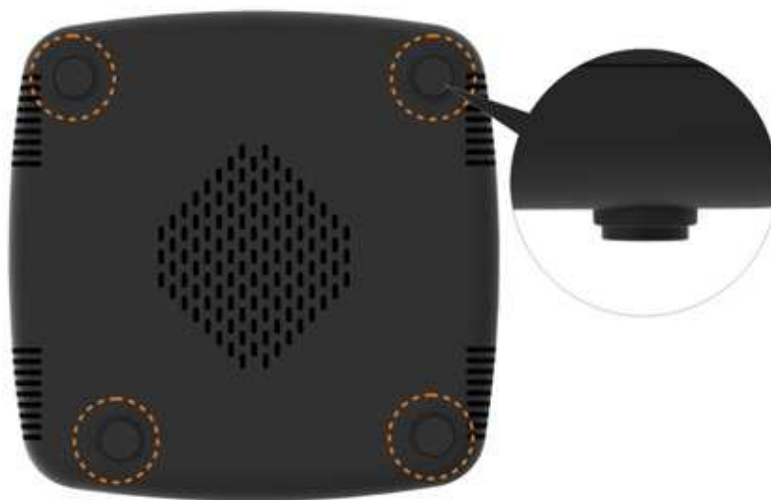

e5

126x126x42mm

## Anti-skid rubber pad,more stable

Installed antiskid rubber pad on bottom, make sure charger placed stable and not easy to slide,prevent desk or car surface be scratched

## Standard parts list

Charger, DC input cable, manual, gift box

e5 charger x 1

DC input cable(XT60-XT30)x1
