

RING GATE (RISP00002) or
RING GATE LED (RISP00007)

The Ring Gates come with genuine 3M Command™ Strips* so they can be mounted on a wall or ceiling.

LED CONTROLLER
OPERATION

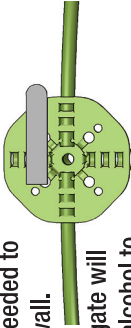

Insert the included two AA batteries into the LED Controller. Pressing the button on the controller will change the LED Rope display to the next mode.

Steady
Slow Flash
Rapid Flash
Off

COMMAND STRIP INSTALLATION

Only one Command Strip is needed to attach the gate to a door or wall.

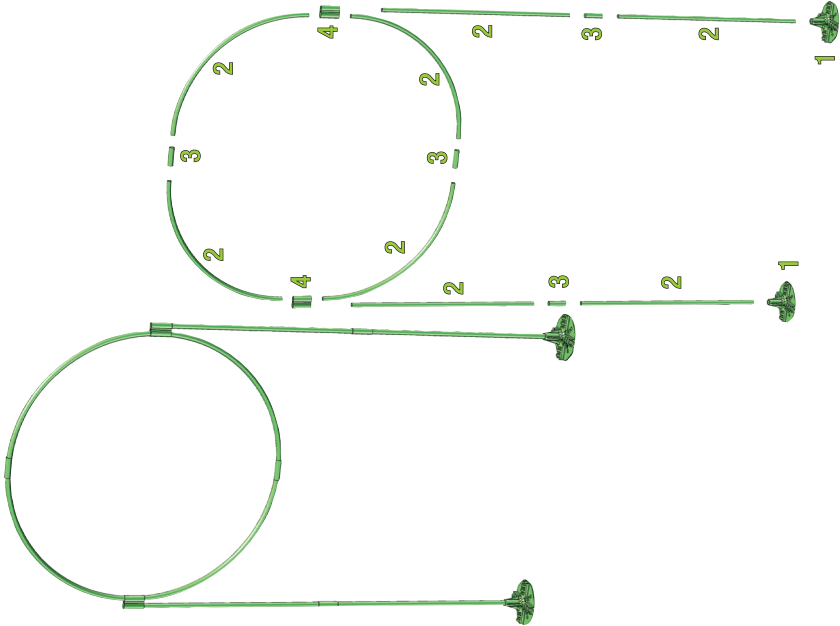

1. Clean the area where the gate will be mounted with rubbing alcohol to remove dust and any residue from other cleaners.
2. Remove the red liner from the Command Strip and apply it to the gate base. The Command Strip(s) should be not be applied directly under the gate ring. The release tab for the Command Strip must not be hidden by the gate base when the gate is mounted.
3. Remove the black liner from the Command Strip and press the gate against the mounting surface for 30 seconds. Do not move the gate for at least one hour after it is mounted.

RING & LED RING GATE PARTS LIST
