Notes: The test condition of temperature is motor surface temperature in 100% throttle while the motor run 10 min.

T-motor Antigravity series products is upgrade some special power system which is popular in the multirotor market. By leveraging precisely comparison test we upgraded them form higher efficiency, higher stability.

antiGravity!TM
EDITION

Antigravity version:
Upgrade your copter and boost
your propulsion system.

MT2814

悬浮 完美升级你的动力系统

To upgraded your multiroto-copter-
power system.

MK3538 is one of the best widely popular motors in the multirotor market, Our MT2814 Antigravity is special designed to upgrade the MK3538.

Relevant parts : **M6** Short prop adapter

Installation of M6 prop

antiGravity!
EDITION

Antigravity 2814 2pc/box all black
(with 1pc CW prop adapter+ 1pc CWW prop adapter)

領航版

Perfecting packing

T-MOTOR
THE SAFEST PROPELLION SYSTEM

Antigravity MT2814
